ABOUT

Innovative Computer Engineering student combining full-stack development expertise with proven leadership. Experienced in engineering responsive applications, integrating AI computer vision models (OpenCV/MediaPipe), and driving a 300% increase in team production output. Passionate about ensuring seamless digital experiences through rigorous UI/UX usability testing, quality assurance in applications, and robust database validation.

PROFESSIONAL EXPERIENCE

LikhaInternet Inc. <i>Internship, Junior App Developer</i>	Mataas na Kahoy, Lipa City <i>June 2025 – July 2025</i>
Full-Stack Development & Deployment: Engineered two comprehensive cooperative-management applications from the ground up using FlutterFlow and Supabase, successfully deploying critical production features including an e-commerce cart, real-time chat, and secure user accounts. UI/UX Optimization: Optimized application interfaces by implementing responsive design principles, delivering a highly intuitive user experience that minimized navigational friction for cooperative members. Backend Architecture: Streamlined the monitoring and management of employees and cooperative members by structuring efficient backend databases and SQL queries.	

LEADERSHIP EXPERIENCE

Association of Computer Engineering Students (DLSL - ACES) <i>Director for Video and Audio Productions</i>	De La Salle Lipa, Lipa City <i>August 2023 – May 2026</i>
Department Productivity: Directed original media initiatives, including "The Lasallian Life Podcast," and authored recognizable video themes, driving a 300% increase in productivity (scaling output to 40 projects) and boosting user impressions by 5,000. Team Mentorship & Branding: Mentored the creative team on brand consistency and UI/UX design standards, providing targeted critiques to ensure all assets met rigorous quality benchmarks. Technical Event Operations: Spearheaded the end-to-end coordination and technical operations for major events, successfully managing logistics for over 1,000 attendees during the "ICpEP General Assembly".	

PROJECTS

Techno-Fitness: Leveraging Computer Vision and Workout Assistance Coach <i>Software Engineering Head</i>
Iterative Testing Framework: Engineered the testing protocol for an AI posture assistant, executing extensive edge-case testing to balance system precision with user tolerance, effectively minimizing false-flag errors during dynamic movements. System Evaluation & Optimization: Directed end-to-end software quality checks, isolating performance bottlenecks in the offline JSON data pipeline and resolving latency issues to ensure seamless, real-time visual and auditory feedback delivery. Award-Winning Validation: Designed and executed structured User Acceptance Testing (UAT) to validate software features and UI responsiveness, directly contributing to the project's 3rd Best Thesis award at the 2026 ACES Hackathon
Engi-Chef: A Data-Structure Based Game <i>Group Leader</i>
Game Development & Database Integration: Developed a time-sensitive restaurant cooking game built with Java and integrated with an SQL database. Applied Data Structures: Engineered core gameplay mechanics and data queries by implementing queues, stacks, arrays, linked lists, and sorting algorithm.

EDUCATION

De La Salle Lipa - College	Lipa City
Bachelor of Science in	<i>September 2022 – June</i>
Computer Engineering	<i>2026</i>

SKILLS

Interests: Editing, Design, Graphics, Coding, Video Games
Technical: Java, C++, Python, HTML, SQL, Figma, Canva, FlutterFlow, Visual Studio, Data-structures
Soft Skills: Team Management, Critical Thinking, Problem Solving, Creative Solutions, Troubleshooting, Documentation
