

ABOUT

Detail-oriented Computer Engineering graduate with a strong focus on database management, SQL querying, and data visualization. Experienced in logical database design and formulating optimized SQL queries to extract, transform, and manage relational data for live applications. Proven ability to bridge the gap between raw backend data and business operations by mapping complex query results into dynamic, easy-to-read administrative dashboards that support informed decision-making.

PROFESSIONAL EXPERIENCE

LikhaInternet Inc. <i>Internship, Junior App Developer</i>	Mataas na Kahoy, Batangas <i>Jun 2025 – Jul 2025</i>
Data Visualization & Reporting: Developed dynamic accounting and operational dashboards for cooperative management systems, structuring backend data pipelines to deliver real-time metrics and actionable business insights for stakeholders. Database Architecture & SQL Optimization: Designed and structured efficient relational databases to centralize cooperative operations. Wrote and optimized complex SQL queries that ensured rapid, secure data retrieval and enhanced the accuracy of employee monitoring systems. Data Integrity & Quality Assurance: Addressed critical system defects and data rendering issues specifically isolating and resolving Null data errors and backend logic exceptions to ensure reliable data processing, maintain database integrity, and guarantee accurate reporting across all platforms.	

LEADERSHIP EXPERIENCE

Association of Computer Engineering Students (DLSL - ACES) <i>Director for Video and Audio Productions</i>	De La Salle Lipa, Lipa City <i>Aug 2023 – Jun 2026</i>
Creative Leadership & Team Mentorship: Directed organizational media initiatives and mentored the creative team on UI/UX design standards and brand consistency. Implemented rigorous quality benchmarks that drove a 300% increase in department productivity, scaling output to 40 projects and boosting user impressions by over 10,000. Technical Operations & Event Management: Spearheaded the end-to-end coordination and technical operations for major organizational events, successfully managing technical logistics and cross-functional teams for over 1,000 attendees during the "ICpEP Regional General Assembly."	

PROJECTS

Burger Joint - Relational Database Architecture Project <i>Database Project</i>	Apr 2025 – May 2025
Database Design & Architecture: Architected a robust relational database schema from scratch, utilizing Crow's Foot notation to map complex Entity-Relationship Diagrams (ERDs) and ensure optimal data normalization. Logical Database Design: Designed the underlying database architecture and mapped entity relationships, defining the primary/foreign keys and constraints that served as the structural blueprint for the development team's Data Definition Language (CREATE, etc.) and Data Manipulation Language (INSERT, UPDATE, etc.) scripts. Data Extraction & Management: Formulated advanced SQL queries incorporating multi-table JOINS, aggregations, and subqueries to efficiently extract, filter, and manage structured data for analytical reporting.	
Cooperative Accounting and Members App <i>LikhaInternet Inc.</i>	Jun 2025 – Jul 2025
SQL Querying & Data Extraction: Formulated and executed optimized SQL queries within a Supabase backend to drive critical application features, ensuring rapid and accurate data retrieval for user authentication, real-time chatting, and management meeting/announcement logs. Data Visualization & Reporting: Extracted and transformed raw relational data, mapping the query results into dynamic, easy-to-read administrative dashboards to support the cooperative's accounting and monitoring operations.	

EDUCATION

De La Salle Lipa <i>College - Bachelor of Science in Computer Engineering</i>	Lipa City, Batangas <i>Sep 2022 – Jun 2026</i>
White Excellence Award: Awarded in recognition of the outstanding involvement and effort as a student leader contributing to the success of the programs geared towards student development. Best Thesis: Recognized with the 3rd Best Thesis award at the recently held "2026 ACES Month: Hackathon Pitching" event for its unique and innovative features and design.	

SKILLS

Technical: Java, C++, Python, CSS, JavaScript, ReactJS, Github, HTML, SQL, Figma, Canva, FlutterFlow, Visual Studio Code

Soft Skills: Team Management, Critical Thinking, Problem Solving, Creative, Troubleshooting, Documentation
