

ABOUT

Adaptable and Results-Driven Computer Engineering graduate specializing in software development with proficiency in Java, C++, Python, and ReactJS. I am equipped with a strong foundation in data structures and full-stack application deployment, having engineered platforms from the ground up with critical features like secure user authentication and real-time messaging. In my work, I combine robust technical problem-solving skills such as directly debugging bugs and errors with award-winning system evaluation experience to deliver efficient, scalable software solutions.

PROFESSIONAL EXPERIENCE

LikhaInternet Inc. <i>Internship, Junior App Developer</i>	Mataas na Kahoy, Batangas <i>Jun 2025 – Jul 2025</i>
Full-Stack Application Development: Engineered two comprehensive cooperative-management applications from the ground up utilizing FlutterFlow, architecting and deploying critical production features including complex accounting dashboards, e-commerce logic, and real-time chat infrastructure. Database Architecture & Backend Management: Streamlined cooperative operations by structuring efficient backend databases and writing optimized SQL queries, ensuring rapid, secure data retrieval and reliable processing for employee monitoring systems. Software Debugging & System Stability: Addressed and resolved critical runtime exceptions and software defects specifically isolating and fixing Assertion, Pixel Overflow, and Null errors to significantly improve overall application stability and ensure reliable cross-device performance.	

LEADERSHIP EXPERIENCE

Association of Computer Engineering Students (DLSL - ACES) <i>Director for Video and Audio Productions</i>	De La Salle Lipa, Lipa City <i>Aug 2023 – Jun 2026</i>
Creative Leadership & Team Mentorship: Directed organizational media initiatives and mentored the creative team on UI/UX design standards and brand consistency. Implemented rigorous quality benchmarks that drove a 300% increase in department productivity, scaling output to 40 projects and boosting user impressions by over 10,000. Technical Operations & Event Management: Spearheaded the end-to-end coordination and technical operations for major organizational events, successfully managing technical logistics and cross-functional teams for over 1,000 attendees during the "ICpEP Regional General Assembly."	

PROJECTS

Techno-Fitness: Leveraging Computer Vision and Workout Assistant Coach <i>Thesis Project</i>	Apr 2025 – Nov 2025
Framework Integration & Computation: Developed the award-winning "Techno-Fitness" workout assistant by integrating OpenCV and Mediapipe libraries on a Raspberry Pi 5. Utilized these frameworks to extract pose data and applied custom angular computation for real-time posture analysis, achieving an 86.08% "excellent" detection rating. System Architecture & Data Management: Designed the graphical user interface and implemented offline data tracking utilizing JSON. Engineered the underlying logic for dynamic workout scheduling, correct pose detection, account systems, and progress tracking. Embedded Design & Hardware Integration: Utilized Arduino to handle fingerprint detection, establishing a secure user authentication. Successfully managed the interaction between the software interface, actuator controls, and other embedded electronic components.	
Cooperative Accounting and Members App <i>LikhaInternet Inc.</i>	Jun 2025 – Jul 2025
Frontend Architecture & Workflow Automation: Developed and deployed responsive application modules utilizing FlutterFlow, streamlining and optimizing the overall workflow process of the cooperative management system. Database Integration & Data Transformation: Integrated a Supabase backend to manage state and application data, writing and executing complex SQL queries to extract, transform, and map raw relational data into functional administrative dashboards.	

EDUCATION

De La Salle Lipa <i>College - Bachelor of Science in Computer Engineering</i>	Lipa City, Batangas <i>Sep 2022 – Jun 2026</i>
White Excellence Award: Awarded in recognition of the outstanding involvement and effort as a student leader contributing to the success of the programs geared towards student development. Best Thesis: Recognized with the 3rd Best Thesis award at the recently held "2026 ACES Month: Hackathon Pitching" event for its unique and innovative features and design.	

SKILLS

Technical: Java, C++, Python, CSS, JavaScript, ReactJS, Github, HTML, SQL, Figma, Canva, FlutterFlow, Visual Studio Code
Soft Skills: Team Management, Critical Thinking, Problem Solving, Creative, Troubleshooting, Documentation
